

PAC supports the operation and sustainment of complex mission systems. Since 2004, we've delivered superior outcomes and operational mission planning support to the MH-60R, F/A-18F, EA-18G and KC-30A platforms. Our team uniquely supports the ICT security and accreditation of these systems because we view cyberworthiness as a key enabler to operational effect.

OPERATIONAL SYSTEMS SUPPORT

Expert knowledge of mission systems, including Joint Mission Planning System (JMPS) and Electronic Flight Bag (EFB), ensuring that pre, post and in-flight data enables operational decision-making. PAC's EFB support covers 2,800+ devices across all ADF aircraft.

Our expertise includes:

- Administration of Windows-based networks
- Administration of Apple-based devices
- Operating classified and sensitive IT systems
- Deep understanding of configuration management, airworthiness regulations and management of aeronautical information
- Mobile Device Management tools
- Data and asset management

FIELD SERVICE REPRESENTATION

Hands-on mission systems expertise, ensuring readiness and capability targets are achieved, specifically:

- 24/7 Mission Systems helpdesk support to domestic and deployed users
- Comprehensive stakeholder engagement and needs analysis to provide superior operational support
- Initial and continuous user training and up-skilling

INFORMATION SECURITY & ACCREDITATION

Our information security team has 30+ years of experience in Defence security domains. This experience, coupled with an operational focus, allows us to understand the delicate balance between system security and system functionality, establishing the most comprehensive and user-focused security solutions possible.

Our expertise includes:

- Certification and accreditation guidance for in-service operational systems
- Infosec Registered Assessor Program (IRAP) assessment
- Configuration design and remediation
- Client embedded security and administration roles such as Information
- Technology Security Officer (ITSO)
- Cyber security education, awareness and training

WHY PAC?

We prioritise clients and stakeholders, collaborating to achieve capability support outcomes. Our expertise in long-term mission systems supports critical ADF platforms. With strong security relationships and strategic locations, we effectively support our clients.
