

Cyber Security

Secure Your Future.

DESCRIPTION OF SERVICES

Diverse experience

Trusted cybersecurity expertise across industries.

User-Centric

Blending security, operational needs and compliance for optimal performance.

Innovative Strategies

Our proactive strategies keep you safe from emerging threats.

Proven Results

A strong track record in delivering robust cybersecurity.

- ASD-endorsed IRAP personnel securing Australian Government and industry systems (SECRET and below)
- Specialist advice across ISM, NIST (800-171), and CMMC frameworks, ensuring compliance and maturity alignment.
- CMMC-AB endorsed Registered Practitioner Advanced (RPA) personnel providing consultation and implementation to meet required maturity levels, strengthening data handling, access controls, and incident response.
- Comprehensive gap analysis to assess system risks and define remediation priorities for certification.
- Expertise in system documentation, configuration management, and DISP compliance to ensure operational readiness

CHALLENGE

Organisations navigating complex cybersecurity frameworks like the PSPF, DSPF, ISM, and CMMC face mounting pressures to ensure their systems are secure and accredited. They must implement effective security controls, manage ongoing risks, and select the right assessors—all while maintaining operational focus and resource efficiency.

SOLUTION

Our team, experienced in both Australian and US security frameworks, includes ASD-endorsed IRAP assessors who guide you through cyber accreditation, helping reduce project risks and save time. We focus on delivering real results, making cybersecurity more than just ticking a box. Whether you're securing your organisation or expanding in the AUS or US Defence industry, we will ensure your projects are secure-by-design and stay on budget, allowing your focus on enabling and delivering your core objectives to Defence.
