

## DESCRIPTION OF SERVICES

Since 2004, PAC has supported the operation and sustainment of complex mission systems for the ADF across multiple platforms.

Operational mission systems expertise

Field service support and user training

Accreditation of in-service operational systems

Data, device and asset management

Information architecture advice

Information Security Policy interpretation & implementation

# Mission Systems

Empowering Militaries with Expert Mission Systems Support Since 2004.

- Tailored mission system support executed at the platform level enabling efficiencies and maximising capability and safety.
- Support for systems that enable operational decision-making capabilities pre-flight, in-flight, and post-flight.
- Unrivalled support for JMPS used on MH-60R, F/A-18F, and EA-18G platforms.
- Management of the ADF EFB system, which includes 2,800+ devices utilised on all ADF airborne platforms.
- System configuration management and security accreditation to enable operational effectiveness.

## CHALLENGE

The advanced, multifaceted mission systems required by the modern warfighter, essential for the precise planning and execution of complex operations, require significant resources to implement, manage and maintain within a security assured environment.

## SOLUTION

Our personnel excel in delivering comprehensive ICT configuration management for mission planning and execution systems, prioritising engagement and responsiveness to end-user needs to ensure seamless integration and functionality. Recognising cyberworthiness as a critical enabler of operational effectiveness, our team is uniquely positioned to provide holistic ICT system architecture, security, accreditation, and ongoing maintenance across diverse mission systems and platforms.

# Empowering Militaries with Expert Mission Systems Support

- **Expertise in Critical Systems:** Our technical and cyber experts excel in mission-critical systems, tactical data links, and training simulations.
- **Tailored Solutions:** We deliver flexible solutions customised to meet your specific needs.
- **Comprehensive Services:** We serve both Defence and Industry through direct engagement, strategic partnerships, and support for prime contractors.
- **Trusted Support:** Our industry experts provide reliable and knowledgeable system support, ensuring top-notch operational outcomes.
- **Embedded Cyber Security:** Cyber security is at the core of everything we do, with highly qualified cyber architects ready to provide IRAP assessments and CMMC level 1 and 2 advice.
- **Strategic Partnerships:** We are uniquely positioned to foster strategic partnerships within the AUKUS framework and connect with US-based elements through our close collaboration with our US division.
