

DESCRIPTION OF SERVICES

Training and Simulation

Independent Assessment
Partner for Training Systems.

FSTD Qualification, Special and Recurrent Evaluation services against FAA/EASA/CASA/DASA Regulations, including:

- Documentation Services - Develop, review and update of FSTD Management Plans, Qualification Test Guides, Test procedures
- Provision of Methods of Simulation training for organisational upskilling

Fidelity Management services for Weapons/Tactics and Part Task Trainers

- Documentation Services - Develop, review and updated of Fidelity Test Guides, Test Plans, Procedures and Reports

Cybersecurity & IRAP Services

- Provision of ASD-endorsed IRAP Assessors to conduct independent system assessment and prepare Assessment (certification) Report for designated Authorisation Authority
- Develop the Training System Security Document Suite, inclusive of the following; System Security Plan, security Risk Management Plan, Continuous Monitoring Plan and Incident Response Plan

CHALLENGE

How can I ensure my training system is fit for purpose against defined Regulatory standards and my organisation's defined Learning Outcomes in a secure and trusted environment?

SOLUTION

Our team of Training & Simulation and Cybersecurity professionals will help you develop and implement an Independent Assessment program to maximise the use and integrity of your training system within a secure and trusted environment, ensuring regulatory compliance and minimising the chances of negative training

Training and Simulation

Providing Acquisition and Sustainment support for advanced simulators.

CHALLENGE

How can I maximise the utilisation, value and effective life of our training system?

SOLUTION

Easy!

Our team of Training and Simulation specialists are well placed to assist with identifying the right training device for your needs, as well as managing your systems installation, commissioning and future upgrades. In addition, we can provide you with a resident sustainment team to ensure your training system and/or simulator is well maintained to maximise it's availability and utilisation for training – giving you the greatest VFM for your investment – all in a vendor agnostic approach.

DESCRIPTION OF SERVICES

Enhancing Defense and commercial training with advanced simulation, evaluation, and interoperability solutions.

- Program Management support, including requirements, resource, cost and schedule management
- Device installation, integration and commissioning services,
- Training system upgrade management, specialising in FMS delivered Increment Upgrades
- Independent Assessment Services across Qualification & Fidelity Management and Cybersecurity – IRAP Assessments
- Technical services, including maintenance and facility management
- Provision of Methods of Simulation training for organisational upskilling

Training and Simulation

Advanced Training Environments

CHALLENGE

How can I provide a training environment that connects training audiences from geographically disparate locations, in a secure and trusted manner to enable Raise/Train/Sustain and mission rehearsal outcomes across small teams, collective and Joint Force audiences?

SOLUTION

Supporting training networks and technologies that enable Advanced Training Environments is something that the PAC team understand and is passionate about.

Our Training and Simulation specialists can provide you with expert advice on operational concepts, network design, data and security requirements to ensure 'fair-fight' outcomes for all participants.

DESCRIPTION OF SERVICES

Enhancing Defense and commercial training with advanced simulation, evaluation, and interoperability solutions.

- CONOPS and Operational Concept Document development
- Agnostic support of Distributed Mission Training (DMT) and Live, Virtual, Constructive (LVC) technologies
- Network, systems and cybersecurity architecture, design and administration
- Technical support, including simulator maintenance an& engineering, network configuration, and system administration duties
- Model & Terrain Library and Data Management
- ASD-endorsed IRAP Assessors providing cybersecurity and systems accreditation and assessment support
